**Summer: What is this fall's palette in terms of makeup?**  
Gold and bronze tones, purples and bits of shimmer.

**Summer: Which products do you recommend for us to keep in our Clutch?**  
Everything I would use in my five minute celebrity makeover.

**Summer: Tell us about Kissable Couture.**  
Kissable Couture is amazing! I started this project two years ago and its finally here. It's a very surreal experience. The vision I had for the brand is now tangible. I think that's the most amazing part of it all. The "First Kiss Collection" consists of seven shades I designed with my partner Keisha Whitaker. Each individual lipgloss comes in a little black case with a perfectly hand tied ribbon. It's the most luxurious lip gloss you could ever give yourself... and this season it's all about getting reacquainted with your "First Kiss" each shade is named after a different boy.. for example, the color "Forest" is named after Keisha's first kiss that really mattered!

**Summer: What are some of the obstacles and challenges you've had to face in this industry?**  
Staying interested! I never want to feel like its work. When it does, I'll take a break. Often when you do celebrities you create a signature look, and once you've done that look for the 10th time (smiles), you want something different! So I still do test shoots with my photographer friends. I just returned from attending fashion week in Milan for a change of pace and for some inspiration.
